TO WHOM IT MAY CONCERN

In August 2014 the Franchisee Christian Buhl installed JIMCO Kitchen Pollution Control System in our restaurant in Næstved, Denmark. The system worked so well, so when I took over in 2018 they had never cleaned their ducts. To this date, we still have not cleaned the ducts and we decided to install the system in all of our restaurants. You may see below pictures which were taken in August 2021.

Best regards
